VOL. 31. NO. 36 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. — FRIDAY, MARCH 5th, 1926.

Golden State
News of Interest to All

Snow and rain fell at Yreka, Humboldt county, simultaneously one day last month.

More than five hundred deer were killed by hunters in Modoc county during 1925.

A new sawmill is being constructed at Doris which will cut 750,000 board feet of lumber per day.

Current settlements for January deliveries to Kings county creameries, total approximately $275,000.

Airplane service between Oakland and Los Angeles, carrying passengers and light freight on a schedule of two daily round trips, has been announced.

Forest fires in California outside the national forests last Summer caused a total loss of $158,810.35, and the patrolling of the timber areas cost $113,948.77.

The Klamath river bridge on the Redwood highway near Eureka, Humboldt county, is nearly completed, linking California and Oregon by a new concrete road.

The Elks of Redding, Shasta county, have plans made for remodeling the business front of the lodge's building. The estimated cost of the improvement is $6,000.

Reorganization of the Golden Egg club of the poultry division of the College of Agriculture at Davis, Yolo county, was held with a gathering of the division members recently.

Improvements which involve an expenditure of $135,000 are being made at the College of Agriculture at Davis, Yolo county, effecting the poultry husbandry and agricultural engineering divisions.

Violations of the state motor vehicle laws during January cost thirty-three California motorists their drivers' licenses according to Will H. Marsh, chief of the state division of motor vehicles.

A capacity train of lumber and lumber products is shipped from Westwood daily. Lumber, moulding and box shook comprise the shipments which have been averaging more than 600 cars monthly.

Logging camps in Lassen county will be opened as soon as weather permits. The Lassen Lumber and Box company and Fruit Growers' Supply company made definite announcements in Sausaillo to this effect.

In 29 cities and towns of the San Francisco bay district 50,222 homes were constructed at a total cost of $174,664,000 during the last five years, according to figures just made public. The total for 1925 was 15,102.

Prominent residents of Marin county are interested in the formation of Marin county's newest and highest country club, the Meadow club of Tamalpais, situated on the slopes of Mt. Tamalpais on Bon Tempe meadows.

The Colusa Implement company, whose payroll now is the largest in Colusa for the year round, is planning to employ fifty more men in the near future, which will double the payroll, to take care of a new enterprise.

Woodlake, Tulare county, turned back to the days of the covered wagon recently, and in its center there sprang up over night the little "boom" camp of a day. "Red Dog," which housed within its tented limits a crowd of merry makers who celebrated under the slogan, "California or Bust."

With the statement that the new forest experiment work in California will be crippled with the appropriation given it by the budget and passed by the house, Senator Shortridge has introduced an amendment to the agricultural appropriation bill increasing the allowance from $30,000 to $50,000.

The activities of a dog poisoner are the source of alarm among canine owners of Oroville. Within the past week fully a score of dogs have died as the result of poison. Included in the number are prize animals valued highly by their owners. Efforts to locate the poison spreader have proved futile.

The Farmers' Irirgation company of Santa Paula, Ventura county, has applied to the state railroad commission for permission to buy pipe lines, reservoirs and reservoir sites of the Limoneira company. The consideration is said to be $61,611.46. The irrigation company expects to spend $77,545.94 in improving the system.

No other state in the Union is better adapted to the raising of sheep than California. The natural advantages which prevail here have made it possible for this state to attain a leading rank in sheep production without the necessity of cultivating large acreages for the maintenance of its animals as in many other sections of the country.

Ripe rasberries were picked at Jackson throughout January.

Yolo county has planted about 50,000 Bartlett pear trees so far this year.

A recent rabbit drive by ranchers at Victor netted 450 jack rabbits in a few hours of shooting.

Three acres of peaches on the C. W. Cockrell ranch at Princeton, Colusa county, brought $1,500.

An olive oil concern is now operating at Lindsay, using machinery which was all imported from Italy.

The Stanislaus County Farm bureau has a membership of 60 girls who are members of girls' clothing clubs.

The latest thing in California farmers' cooperatives is the Northern California Persimmon association organized recently with a woman, Miss Clio O. Dwyer, as secretary.

Valencia prospects this season are much better than they were last year as regards yield, and prices are expected to be equal to those of last year, according to local authorities.

Approximately 130,000 acres of school lands in Shasta, Modoc, Siskiyou, Lassen and Trinity counties will be sold at auction soon. Virtually all of it is in the mountainous sections.

Lindsay, Tulare county, valencia growers feel that the absence of frost damage thus far is due to a generous use of orchard heaters. There has been a great increase in orchard heating and frost protection this year, according to the horticultural commissioner's office.

The appointment of A. J. Lintner, Victorville, San Bernardino county, to the directorate of the Mojave river irrigation district has been confirmed by the board of supervisors. The sale of $2,500,000 in bonds will follow. The project is designed to furnish water to 25,000 acres.

Idaho leads all states outside of California shipments of butter to the Los Angeles market, while Montana leads all except California in shipments to San Francisco, according to an analysis of butter market receipts made by Sam H. Creene, secretary of California Dairy council.

Planting along program lines is being urged upon Delhi colonists, in Merced county, the advantage gained being that the individual profits from the experiments of his neighbors, and after a few failures have been recorded with a certain fruit or variety of fruit, the grower need not spend money trying it out any more.

America led in the Selma egg-laying contest during January, with the Mediterraneans close behind. In other words, that proud old breed, the Barred Plymouth Rock, represented by the flock of W. C. Whitener of Caruthers, Fresno county, was in the lead, with the White Leghorns, the great egg breed, relegated to second place.

At the recent annual meeting of stockholders of the Wasco Creamery and Construction company at Wasco, Kern county, the treasurer reported that the business done during the past year amounted to $795,000. Total assets were given at $371,255.80, with liabilities at $130,853.22. Capital stock outstanding is about $200,000. Divdends of about $30,000 were declared during the year.

On display at the state department of agriculture in Sacramento is a carrot weighing nine and three-quarters pounds, one of the largest carrots ever brought to the attention of the agricultural authorities. It was grown at Colma, near San Francisco, by A. Conserba and Louis Neva, truck gardeners. Inscribed on a placard attached to the carrot is the facetious couplet: "A carrot a day keeps the doctor away."

Apple growers are greatly interested in the preparations of state and county fruit authorities to discover if possible what prevents proper pollination in the apple orchards of the Yucaipa valley. For several years the trees have not set as heavy crops as they should and the experts are inclined to think that the cause has been insufficient pollination. Plans have been laid to make a study of the trees under varying conditions. A test plot has been selected and will be under close inspection for several seasons.

ROSE CARNIVAL A COUNTY ADVERTISER

What is the advertising value of the Fiesta de las Rosas to Santa Clara Valley?

This question was asked A. E. Buhot, Chairman of the Publicity Committee of the Fiesta. It didn't take long for the Publicity Chanirman to make it clear that, in his opinion, the Festival to be held here in May will be worth many thousands of dollars to Santa Clara Valley.

"It is unnecessary fo rus to talk in generalities when it comes to estimating the advertising values of the Fiest," said Buhto. "For every dollar we spend on the Fiesta the merchants will get back at least five or six dollars in actual, tangible, measurable advertising space impossible to purchase or procure in any other manner. We have already had columns of publicity in the various papers about the Bay, various parts of the state and Nevada. This, however, is negligible compared to the publicity that we will receive just prior to the Fiesta dates and following them when it is over. All the world is interested in a flower festival. Already our committee is beseiged with requests from publications, far and near, for stories on the parade, the rose show, the dance-drama and other parts of the fine program. Large newspapers, east and west, are planning rotogravure sections of this event. Motion picture pictorial services have planned to run the festival in theaters throughout the country.

"I know of nothing else that could possibly bring to us so much fine and worthwhile advertising, dollar for dollar, than this planned Fiesta de las Rosas. Evene when we have considered newspapers, the magazines, the pictorial features, the motion pictures, we have not begun to tell the story. The general prestige and reputation that will be given our Valley and community as a rose-growing Valley and as a place of beautiful homes and gardens will be worth many times what the Fiesta will cost.

"When it comes to real community advertising we certainly have it here."

Ed Smiley of our community has been very actively engaged with the work of this Committee. Since this is one of the major committees of the Fiesta this committee work will become more and more important.

Buhot is General Manager of Chas. C. Navlet Flower and Seed Store and has lived in San Jose for thirty-one years. He is a member of the Elks, Kiwanis Club, Chamber of Commerce and Native Sons of our Valley City.

Members of the Publicity Committee with Buhot are: Willard Parsons, Geo. Smith, Ernest Wiliams, William Baylor, Lloyd Trousdell, William Geoffrey, William Halla, Harry Canelo, Henry Murgotten, Geo. D. Gilman, Dan Gray, J. McKiernan, Jr., L. C. Glennon, Wendell C. Thomas, Ed Smiley of Los Gatos; Ray Smith of Palo Alto; R. Hook, Jr., of Mountain View, and F. C. Staniford of Gilroy.

An appeal to the public for support during the coming season in helping to keep forest and water shed fires at a minimum was made yesterday by S. R. Black, secretary of the California Forestry committee. The cooperation of the public is needed not only in keeping fires out of standing timber but also in keeping them off logged-off lands, where the new crop of young timber has taken root.

Tossing her bonent in the ring, Assemblywoman Grace Dorris of Kern county, who has served for the past three terms, announced recently that she will contest with all comers for both the Republican and Democratic nominations for the state assembly. She declined to become a candidate for state senator from the Thirty-second district, comprising Kern, Tulare and Kings counties.

According to its recent annual report, the Tapo Citrus association, at Santa Susana, Ventura county, made $234,567.37 in net returns during 1925. It shipped 2,847 packed boxes of navels, receiving $3.82 f. o. b. The valencia, of which there were 21,547 boxes, netted $8.28 a box. The highest price per box received for a straight car packed under one brand was $12.45. The highest price by size was for a lot of 100s and 126s packed under the Tapo brand and sold at auction in New York November 13, bringing $19.15 a box. The association shipped 22,718 boxes of lemons averaging $4.73 a box.

WARM WEATHER IS AID TO FRUIT

The warm weather of the last few days has been beneficial rather than determined to the fruit crop of the valley, according to L. R. Cody, county horticulitural commissioner, and J. T. Brooks of the California Prune and Apricot Growers' Association at San Jose.

Fears expressed by many persons that the warm weather would advance the blossoms so much that late spring frosts would be likely to injure the crop are entirely unfounded, both Cody and Brooks declare.

"Both apricots and prunes are entirely normal throughout all the territory I have been over during the last few days," Cody says. "The few days of warm weather are not unusual for this time of the year and have little effect on the trees so far as advancing the crop too far is concerned."

"This warm weather has been a benefit to the fruit crop in the valley, especially to the apricots Brooks said.

"Brown rot flourishes in wet, cool weather. Because of all the rain we had recently, coupled with the cool weather which followed it, fruit specialists were advising growers that spraying was necessary if brown rot was to be avoided.

"The bright sunshine of the last few days has been a great benefit in this respect. Brown rot does not flourish in dry, sunshiny weather, the weather we have had recently has done a great deal of good in checking it.

"So far as the state of advancement of the blossoms is concerned, I believe it is just about normal. The season was rather late because of all the cold weather during January and February. This warm weather brings it just about to normal.

"Of course, if the warm weather continues right now, and is followed by heavy spring frosts, the growers will have to smudge. But there is little or no danger to the crop."

Cody agreed with Brooks as to the benefit of the sunshine of the last few days in checking brown rot among the apricot orchards.

With a total fund of $75,701 the financial campaign of the Stockton, San Joaquin county, chamber of commerce officially closed recently. The budget of the organization will be revised to come within this figure for the year. Originally it had been planned to raise $104,000 for the activities during 1926. The membership of the chamber was increased 150 members to 1,154.

The Biggs, Butte county municipal power plant is planning extensive repairs on the electric lines. The plant is municipally owned and was constructed in 1904. There are seven miles of pole lines in Biggs, and the project will take about three months. The value of the plant is placed at $10,774.20. Power is sold to the city of Biggs by the Pacific Gas and Electric company.

Great building activity is being looked for in Oroville, Butte county this spring, with work started on four buildings already and surveys now under way for three additional structures in the business section. Surveys of the proposed $50,000 American Legion Memorial hall in upper Montgomery street, authorized recently by the board of supervisors, have been made.

Pruning in Tulare county is practically over although grape growers will be late with this work. Most of the deciduous orchards have cleaned up and crews are now operating in the vineyards. Pussy-willows are out in sunny places and the tree buds are swelling rapidly. Pruning in Tulare county was somewhat delayed this season by the foggy weather.

Construction of two $15,000 buildings in the downtown district of Merced, Merced county, will begin soon it was announced by investors.

Of all the courses offered to the night classes at the Lodi, San Joaquin county, high school, mechanical drawing was the least wanted.

The opening of the new $150,000 packing plant of the Upland Citrus association at Upland, San Bernardino county, one of the largest members of the O. K. Exchange, will be effected this month. The new plant is constructed of reinforced concrete and the equipment is modern.

An application for permission to establish a junior college in Marin county, serving the San Rafael and Tamalpais high school districts, is being considered by the state board of education. If state approval is given the question will be placed before voters in Marin county.

GRAMMAR SHCOOL STUDENTS ACTIVE

The Grammar school has earned a radio. Since last spring, they have been working to get this. A city paper made the school an offer of a two hundred dollar radio for a certain number of new six months' subscriptions. A number of these were secured before school was out in June and the rest have been obtained since.

This fine radio would not have been possible but for the fact that the patrons of the district, including the P. T. A. have been so willing to help by taking the paper, even when they did so simply as an accommodation. The teachers and children are very appreciative of the privilege of having such a fine set and they are extremely grateful to those who have helped them to get it.

The P. T. A. has been giving a prize of $1.50 to the class having the biggest precentage of mothers at the meetings. Miss Mace's room has won this prize 3 times in succession which is about enough for them as the other rooms think. The money will probably be used for class expenses.

Elections

Of the activities of the High Eighth the most interesting was the election of the officers of the class. The election resulted as follows:

Carolyn Lund—President.
Anna Lovoi—Vice President.
Veva Nichols—Secretary.
Harold Gardner—Treasurer.

Veva Nicholls, elected secretary will hand in her resignation in the next meeting and her only opponent in the election, Mary Rossotta will be appointed to the position of secretary by the president, the class having voted the issue unanimously at the previous meeting.

Achievement Tests

Last week the Stanford Achievement Tests were given at the Campbell Union Grammar School.

They were given to see if our school was as far advanced as other schools in the county. They are sent out by the County Office.

Honor System

You will probably see the students of Campbell Union Grammar School who received block letters at last commencement, wearing them on their sweaters, middies and dresses.

Dressing Room Committees

The members of Miss Mace's class were asked to see that the dressing rooms are kept in order.

The president appoints two boys and two girls for each day to keep duty.

The penalty for being careless is having to pick up all papers and scraps in the dressing room, and make up ten minutes at recess.

GROUPS CONFER

A joint conference of representatives of the Y. W. C. A., Camp Fire Girls, Boy Scouts, and Y. M. C. A. was held at the Lion's Den, Alum Rock Park, last Friday evening to consider methods by which these organizations can work together on common community projects, and to learn more about the purpose and ideals of the organizations.

Those representing Camp Fire from Campbell were Mary Maxon and Elsie Merrill, of the Cherokee Group of the High School.

"SHERWOOD" MAR. 19

The Senior Show "Sherwood" will be given Friday evening, March 19th. "Sherwood" is a popular play by Alfred Yoyes. Eleborate scenery and costumes are being prepared in order to put the play on in a manner that will be a credit to the school. Remember the date, March 19th.

GARDENING CLUB SUBJECT

At this season of the year when every lover of flowers is at least thinking garden if he isn't actually planning or planting one, the subject of "gardening", which was the topic for the Country Woman's Club Monday was very timely.

Mrs. J. D. Blaine was the chairman and opened her paper with several quotations from noted writers concerning gardens and flowers. She had chosen as her part of that very broad field, "Cultivated Wild Flowers," of which she has successfully grown many varieties, some from seeds and a few by transplanting. She read an extract from a letter, from Mrs. Elgin Hurlburt of Pacific Grove in which she described the wild flowers growing upon their mountain ranch.

Mrs. Wm. Mason had selected "Shrubs" as her topic and read interesting bits from "gardening in California," and enumerated various shrubs, both wild and cultivated, suitable for different purposes. Several of the wild shrubs thrive well in gardens and are very attractive. Mrs. J. F. Duncan was unable to be present on account of illness in her family.

Last summer, Mrs. E. I. Price had a very fine collection of delphinium and she gave a very comprehensive account of their planting and cultivation, and Mrs. R. Alison, whose wonderful success with chryanthemums has won her many prizes, explained her methods.

A general discussion with numerous questions showed how general is the interest in the various phases of this subject. At th ebusiness meeting three new members were elected. Mrs. Alison announced that the date of the County Federation meeting in Campbell had been changed to March 26th, and that on April 19th, the Los Gatos History Club will present a program before this club in exchange for the one which the Country Woman's Club gave there Wednesday of this week, which follows:

Mrs. H. M. Shadle sang by request "Doris" with violin obligato by Mrs. F. Perrott and Mrs. G. S. Robson at the piano, and Miss Helen Kalas sang a proup, "Twilight," "My Mother Bids Me Bind My Hair" and "Today" with "The Pine Tree" for an encore, with Mrs. E. C. Merrill as accompanist. Mrs. W. H. Crothers read a very fine paper on "Modern Literature and the Zietgust."

In keeping with the theme of the day, beautiful bowls and baskets of wild flowers, pansies, shooting stars, butter cups and greenery were attractively placed. At the close of the program the committee distributed packets of wild flower seeds to those who wished.

MARCH MEETING OF HIGH SCHOOL P. T. A.

The next regular meeting of the P. T. A. of Campbell Union High will be held on Tuesday afternoon, March 9th at 2:30 p. m. in Miss Gardner's room.

Mrs. Paul C. Alexander of the Oaks Sanitarium, Los Gatos will review "Youth in Conflict" by Dr. Miriam Van Waters. As this book has been recommended as a basis for a study program in P. T. A. groups. We urge your presence at the meeting. "On the Bookshelf for Parents'—'Youth in conflict' is one of the practical helps available on the many problems all parents have to meet."

Mrs. Alexander is a very fluent speaker of magnetic personality and is thoroughly acquainted with the merits of this valuable publication.

Remember the date, March 9, at Campbell Union High School. The public is cordially invited.

H. C. TUTTLE

Twelve hens and a rooster ten years ago formed the poultry nucleus for H. Johnson, pioneer poultryman in the Saucilito district west of Terra Bella. Today he operates one of the leading poultry ranches of Tulare county. Mr. Johnson is prominent in the Porterville Poultry association. He has just realized a long-cherished dream, he declares. Recently he came to town with 1,012 eggs. For ten years he has looked forward toward the goal of gathering 1,000 eggs a day.

P. G. and E. News Service

A crew of approximately 200 men are now working on the Pacific Gas and Electric Company's Pit River No. 4 Power Project. Work is progressing on the big tunnel, diversion dam, flumes and foundtaion work for the permanent dam, according to O. W. Peterson, Engineer of General Construction.

The Pit No. 4 Plant when completed will have an installed capacity of 134,000 horsepower and will be the largest installation on the Pacfic Gas and Electric Company's interconnected power system, consisting of 26 hydro-electric plants and 4 steam electric plants.

The tunnel on the Pit No. 4 job will be 23,782 feet in length and 19 feet in diameter. It will be driven from four headings and have a capacity of 3000 cubic feet of water per second. It will be concrete lined throughout.

The temporary diversion dam has been completed and shortly when the flood waters have receded the entire river will be diverted through a temporary flume 1600 feet in length to a point below the permanent dam site. This flume is 11 feet deep and 24 feet wide and of sufficient capacity to carry a volume of 3500 cubic feet of water per second, more than the usual flow of the river between May 1st and December 1st.

The permanent dam will be located two miles down stream from the Pit No. 3 Power House, which has an installed capacity of 108,000 horsepower. This dam will rise 60 feet above the surface of the river and will have a total width of 430 feet. About 50,000 cubic yards of concrete will be used in its construction.

The reservoir created by raising of the river level will be of 2000 acre feet capacity, backing up to and serving as an after bay for the Pit No. 3 plant. A concrete mixing plant including cement storage house, sand and gravel bunkers and a modern construction camp have been erected. The tunnel has been excavated for a distance of 300 feet. The work on the dam is scheduled to be completed by the end of the present year.

Dr. C. A. Hamlett, a pioneer rancher of Imperial valley, owns 320 acres of land near Westmoreland, Imperial county. He has put this to field crops profitably for several years, but now has decided that it will pay better if set to grapefruit trees. A large acreage will be set out to this citrus fruit immediately.

P. S. Wetmore, manager of a Benicia, Solano county, canning company, is getting ready for the opening of the canning season. Workmen are busy on the new warehouse and preparations are under way to construct more cottages for the employes. It is expected that the pack this year will be 50 per cent larger than that of last year. The pack of last year was the largest ever put up at the local plant.

Operators of Alta Combination mines near Grass Valley, where Robert Hill, a miner, was imprisoned for three days during a cave-in last June, have at last struck "pay gravel" after a six-year quest for a missing gold channel, according to late reports. The Alta Hill channel, which the miners believe they have found, yielded $265,000 worth of gold before operations were halted years ago by water flow.

WHEN EXPENSE IS ECONOMY

An interesting experiment in road economy was conducted recently by two motor bus lines running between Hoopeston and Danville, Illinois, and between the latter city and LaFalette, Indiana, respectively. The Hoopeston-Danville road is paved its full length of 24 miles. The Danville-LaFayette routs consists of 42 miles of gravel and 16 miles of pavement. Under the same management, and with the same type of bus used, the two lines compared as follows: on gravel the tire life averaged 15,000 miles; on pavement it was 25,000 miles. In gasoline consumption the gravel road allowed only 9 miles per gallon, while the paved road yielded 12 miles per gallon. As to maintenance, the bus on the gravel road cost 50 per cent more than the one traveling on pavement.

Multiply this result by thousands, in terms of automobiles and trucks, and you have as a product the return on the investment in good-road building in a few years' time. The seeing paradox—that expense is economy—vanishes in the light of truth when applied to many of the expenditures for modern needs. There is something in quality which brings its own reward, whether it be put into roads, clothing, lead pencils or watch-dogs; and many things are paid dearly for when done without.

SENATE ACTIVITIES

Now that the Department of Justice has made its report giving the Aluminum Company of America a clean bill of business health, it is reported that Senator Walsh will pursue his program for another sweeping inquiry. The Montana Senator, noted for his oil investigations, has done some good work in his official capacity. But the question arises whether the Senate in recent years has not gone astray from its primary function of making laws, and assumed too much of the judicial and administrative powers of the Government.

The least that can be said on the subjetc is that the numerous investigations instituted or actually carried on by this august body reflects the necessity for the inquiries. Democracy fills all gaps; and altho it sometimes strains its forms, its substance always seeks its own levels. The tendency to probe and investigate being more or less inherent and natural—is exerting itself only in proportion to the manifestations of social and economic ulcers on the body politic.

"SERMONS IN STONES"

A negro preacher, arrested for speeding, was sentenced to five days in jail. The first night he began writing a sermon to deliver to his fellow prisoners on Sunday. He weighed 270 pounds, and found his bunk too small. But he did not complain. He said he could sit up all night just as well as not. Further, to the jailer, he said that his imprisonment really made no difference, for when one follows the ministry there are times when there is no place to lay one's head. He pointed to the fact that Paul was in jail at one time, and John the Baptist was beheaded.

Whether this preacher is effective in the pulpit we do not know. But there is a sermon in his attitude. While it is true that in certain jurisdictions jail sentences for traffic violations have become so common as to be not unpopular and particularly discomforting, yet there are few of us, perhaps, who would maintain 100 per cent possession of balanced emotions under circumstances of incarceration as in the case cited. Because usually the less we are put in jail for the madder we get.

IS CALIFORNIA TOO BIG?

Argument has been advanced that California ought to be divided into two commonwealths, Northern and Southern. When the 3,500,000 population of California in its 158,000 square miles has reached comparable difficulties with Italy's 37,500,000 population in its 117,982 square miles, there will be time enough to talk of geographical division. The plea, however, is based on disproportionate voting representation; but this condition arises either potentially or actually in every State and political unit, hence the subdivision of those units, large or small, would not necessarily cure the defect. One might cut off the Panhandle of Texas, the neck of Idaho, the left arm of Florida, the Strip of Oklahoma, or the Upper Peninsula of Michigan, for no good reason at all, but to the greater complication of government and expense of administration.

CONSULT YOUR BANKER BEFORE DEALING WITH STOCK PROMOTERS

The State Corporation Commissioner has issued a new warning to unwary investors to be on their guard in dealings with unauthorized promotors. Just now, widows are being being singled out by get-rich-quick salesmen as the most credulous class of prospects. A few moments' consultation with your banker will save many anxious hours later.

The Mercantile Securities Company of California, affiliated with the Mercantile Trust Company of California, will be glad to advise any prospective investor, without the slightest obligatfon, as to the worthiness of any stock or bond issue. Do not risk the savings of a lifetime in promotions you know nothing about.

A note of warning to wool growers of the country was sounded at the annual meeting in Red Bluff, Tehama county, of the Northern California Wool Warehouse company by Fred A. Ellenwood, vice president of the National Wool Growers' association, who, although the United States is enjoying marked prosperity, cautioned the growers against over-expansion and the tendency to spend money recklessly. He said unless they get back to a more conservative basis, they are "riding to a bad fall."

That a large tract will be bought in the Lodi section of San Joaquin county and colonized by dissatisfied Nebraska farmers, is the statement of Col. Robert S. Oberfeld of Lodi. He has been quietly looking over the country from Sacramento to Lodi for some time, and states he is highly pleased with what he has seen. His Eastern associate, whom he declines to announce at present, sent a scout into this section several months ago and his report, states Oberfeld, was all that could be wished.

Town Tales Tersely Told

CHAMBER OF COMMERCE MEETING MONDAY

The J. Bannister family of Minna St., is quaranteed for a very light case of scarlet fever.

Mrs. Worthin Grattan and parents, Mr. and Mrs. G. V. Horn have recently returned from a trip to Los Angeles.

Mrs. J. H. Neff and Mrs. Minnie Frisbee left Tuesday for the south where they will visit in Los Angeles and San Diego.

Mr. and Mrs. Frank Mendel recently moved into their attractive new home which they had built in South Gate Park, Palo Alto.

Mr. and Mrs. S. E. Eddlemon, of San Francsico are visiting his mother, Mrs. Eddlemon and brother, L. E. Elldemon and family.

Mr. and Mrs. J. H. Campbell expect to return soon from Honolulu where they have spent some months with their son, Delbert and wife.

Mr. and Mrs. Chas. Lloyd, nee Gladys Townsend, are receiving congratulations on the birth of a son recently. This is their second child, the older being a girl.

At the Merchants luncheon Wednesday, Chas. Shumway, Willard Battery expert gave a very interesting and enlightening talk on "batteries and battery service."

Mrs. M. E. McCaughey who was operated upon sometime ago at the U. C. Hospital has been convalescing very satisfactorily and expects to return within a few days.

The many friends of Miss Alice Duncan will be glad to hear that she is well on the way to complete recovery and the house is undergoing the cleaning and fumigating processes.

The Woman's Guild will meet on Thursday, March 11th, at 2 p. m., in the parlors of the Congregational church. A large attendance is hoped for as there is work for all who come.

Mr. and Mrs. B. R. Herriott, who were here last year have returned and are living in the cottage on North First St., formerly owned by Miss Lawrence. Mr. Herriott manufactured and sold nomosquit.

Mrs. Wilbur Whitney, wife of Mr. Whitney of the Campbell Union High School faculty was operated upon recently at O'Connor Sanitarium. She has been convalescing very satisfactorily and expected to come home this week.

There will be a Progressive Whist party given under the auspices of Ada Rebekah Lodge, Saturday, March 20th, at the I. O. O. F. Hall, beginning at 8 p. m. Admission 50c, including refreshments and prizes. Tickets at Lea's Store or at the door.

Those who have not registered since January 1, 1926 are not eligible to vote at the school election to be held March 26th. Those who have registered during March are not eligible. This is in accord with a recent decision concerning the application of the registration law.

Dr. W. I. Merrill, chairman of the sanitation and sewage committee of the Consolidated reports that further action has been delayed awaiting the Supreme Court decision on the Acquisition and Improvement Act of 1925. This decision is expected favorable on or before March 14th, and will greatly facilitate the progress of tihs committee.

Mrs. C. E. Berry is the proud possessor of an extremely beautiful inlaid box, with a tray lined with velvet, as is also the inside of the box. The box itself is beautifully polished and shows thecareful work of many hours. It was given to her by one of the soldiers in the Palo Alto hospital, whom she has remembered at Christmas time, and is a remarkable evidence of his appreciation as it is his own handiwork.

MRS. LIZZIE BARNES

The passing away of Mrs. Lizzie B. Barnes was a shock to many who knew her, but did not know of her condition.

For some years she has made her home with her daughter, Mrs. Harry Williams on San Tomas road and by her quiet sweet manners had endeared herself to all. She had lived a busy life being over 82 years old at her death.

The sympathy of their many friends is extended the bereaved ones.

The funeral services for E. Ray Stevens were held at Oakland last week, conducted by Morning Light Lodge, I. O. O. F. of which he was a member. Many of the order attended from here. Mrs. Stevens and children are with relatives in Oakland.

Orchard City Creamery under the management of H. E. Nielsen will open its doors in Campbell tomorrow in the Miracle Block. The Company's advertisement appears on another page of this issue and a study of its contents will be of benefit to our readers.

Flagpole Used In Forestry Experiment

Even flagpoles can be used in forestry experiments. The proof of this is the experiment performed recently by Howard Siggins, a garduate student of the Division of Forestry of the University of California College of Agriculture.

The flagpole of the University is 190 feet high; so Siggins raised a bag of fir seeds to the top of the pole on a windy day last week. Then breaking the bag he stood with a stop watch in one hand and with his eyes on the seeds as they fluttered down and blew over the University grounds.

The experiment was conducted as part of a project on the study of the dissemination by seeds of the important conifers of California. The problem is of importance from the standpoint of reforestration.

CHAMBER OF COMMERCE MEETING MONDAY

As a result of valley-wide interest in the labor situation and its effect on the 1926 harvest season and because of serious losses sustained by agriculturists in 1925 through a shortage of farm workers, directors of the Agricultural Labor bureau of San Joaquin valley, the new organization that will handle supply and distribution of farm labor in this area outlined its policies for the coming year at a recent meeting.

The Kern county farm bureau has created a labor board to care for the needs of farmers for seasonal transient labor. This unit will tie its activities in with those of the labor organization recently organized by the seven San Joaquin valley counties at a meeting in Fresno. The plan is to hire a manager during the season when labor is in demand to keep in touch with local needs and with labor supply centers.

"The biggest problem in the state of California today is the water problem," declared H. E. Martin, past president of the Tulare County Farm Bureau, in an address before the Dixieland Farm Center, in Madera county, on irrigation. Recently the Dixieland center adopted a resolution endorsing the work of the California State Irrigation association.

Advance payments on fruit delivered in 1925 are being based this year on co-operative gradings and not on a flat tonnage basis. This was announced recently by the California Co-operative Canneries, officials of which announced that checks for the second advance payments on the 1925 crop are being sent out this week.

Statistics just compiled in Kings county of last year's production show twenty-three leading agricultural products, bringing in $11,061,758. Until the past few years grapes were the leading product, but now raising industry is surpassed in value by dairy products and cotton.

The California Cattlemen's association reports the opening of a new office at Brawley. This action was made necessary, it announces, because of the large increase in the number of cattle recently signed up by this association in the Imperial valley.

While California is busy planning for expansion of her growing cotton industry, and planning how to spend the millions in cash which it brings every year, the South is taking just the opposite stand and is striving to cut down the acreage of cotton.

J. B. Whiteman, president of the Brady, Texas, Chamber of Commerce, Harry F. Schwenker, publisher of the Brady Standard, and Ira Q. Mayhew president of the Mayhew Produce company, are in Petaluma and will invest in the poultry business.

SMITH'S STATIONERY STORE

CHAMBER OF COMMERCE MEETING MONDAY

The El Monte, Los Angeles county district offers real advantages for poultry farming in the opinion of Charles Flanders, who says he netted $1,100 profit from 475 White Leghorn hens during the year which ended August 1, 1925.

The California Lima Bean Growers' association at Oxnard, Ventura county, has made another payment of $1 per hundred on reclaimed beans. This makes a total of $8.50 per bag on baby Limas and $7.50 on regular Limas.

Now is kite time, boys.

AGRICULTURAL CONDITIONS ARE NOW IMPROVED

General business activity in the Twelfth Federal Reserve District continued at relatively high levels during January, 1926, according to a report of the Federal Reserve Bank of San Francisco. Trade and industry were seasonally less active than in December, 1925, but it is estimated that goods were produced and distributed in larger volume than in January, 1925. There was an ample supply of credit available, and demands upon the Federal Reserve Bank of San Francisco were seasonally low.

Debits to individual accounts (bank debits) at banks in 20 principal clearing house centers declined slightly during January, 1926, but the decrease was less than the usual seasonal decrease for that month. This bank's index of bank debits, adjusted for seasonal variations, advanced from 148 in December to 155 in January, 1926 (1919 average, 100.) In January, 1925, it stood at 135.

Trade at retail, as reported by 32 department stores in seven principal cities of the district, was 49 per cent smaller in value during January, 1926, than during December, 1925. This decrease compares with a usual seasonal decline from December to January of approximately 44 per cent.

Value of sales of 166 wholesale firms in eleven lines of business decreased seasonally during January 1926, but was 0.8 per cent greater than in Jan. 1925, increased sales of six of the eleven reporting lines offsetting decreases in the remaining five lines. The general wholesale price level was 2.5 per cent lower during January, 1926, than during January, 1925.

Mild winter weather and ample rainfall were reported from most parts of the Twelfth Federal Reserve District during the last two weeks of January and the first weeks of February and seasonal measurements of rainfall at mid-February approximated normal in the important agricultural areas of the district. As a result there has been a measurable improvement in conditions of fall-sown grain crops, of livestock pastures and ranges, and in the whole physical aspect of the agricultural situation. Livestock of the district generally are reported to be in good condition. In the early lambing sections, particularly California, lambing is proceeding satisfactorily.

That stability in the general price level which characterized the year 1925 continued during January and early February of 1926. The index of prices of 404 commodities at wholesale, prepared by the United States Bureau of Labor Statistics, stood at 156.0 for January, 1926, compared with 156.3 for December, 1925, 160.4 for August, 1925, the recent high point, and 160.0 for January, 1925. All the groups comprising the index, except fuels, building materials, and miscellaneous commodities showed price declines during January, 1926. During November and December, 1925, and January, 1926, prices of agricultural and of non-agricultural commodities moved together and the purchasing power of farm crops remained unchanged at 87. (August 1909—July, 1914 monthly average 100.) This was in contrast to the movement of those two series during September and October of 1925 when prices of agricultural commodities declined and prices of non-agricultural commodities were unchanged, the result being a decrease in purchasing power of farm products from 93 in August, 1925, the highest point reached since June, 1920, to 87 in November.

Total loans of reporting city member banks declined during January, and increased during the early part of Feb., normal seasonal movements. On February 10, 1926, these loans amounted to $1,181,000,000 and were $109,000,000 or 10.2 per cent larger than a year ago. Investment holdings of reporting banks increased, and their borrowings from the Reserve Bank decreased during the month, evidence of an abundance of available funds.

Value of building permits issued in 20 principal cities of the district declined 21.3 per cent during January, 1926, as compared with December, 1925, and was 7.3 per cent less than in January, 1925. The usual seasonal decrease from December to January is estimated at 22.8 per cent. Large gains in value of permits issued in San Francisco and Seattle during January, 1926, as compared with January, 1925, were more than offset by decreases in Fresno, Los Angeles, and Portland.

During January, 1926, lumber production at reporting mills of four associations in this district was less than during December, 1925, and January, 1925, by 14.8 per cent and 11.3 per cent, respectively, and was smaller in volume than in any month since February, 1923. Volume of new orders received durnig the month was 2.8 per cent less than volume of orders booked during December, 1925, but was 10.8 per cent greater than in January, 1925. Orders received during January, 1926, exceeded shipments, which in turn exceeded production, so that stocks of lumber held by mills decreased and unfilled orders increased.

Average daily production of petroleum in California decreased slightly as compared with December, 1925, but was 1.7 per cent larger than in January, 1925. Indicated consumption increased during January, 1926, but was less than production, and stored stocks reached a new high point of 127,374,948 barrels on January 31st. Seasonal declines in flour milling activity continued during the month. Output of 16 representative milling companies of the district, which report regularly to this bank, was approximately 18 per cent smaller in volume than during either December or January, 1925. As compared with the five-year (1921-1925) average for January, production during January, 1926, showed a decline of 28.1 per cent.

Millers' stocks of flour increased during January, but on February 1st were 13.6 per cent smaller than the five-year average of stocks held on that date. Reported holdings of wheat at the mills decreased 21.2 per cent during January, but on February 1, 1926, they also were larger than the five-year average holdings on Feb. 1st.

NOTICE OF ELECTION

Notice is hereby given to the electors of Cambrian School District, Santa Clara Co., Calif.

That an annual election for the election of school trustees will be held March 26, 1926, at the school house.

There will be one trustee to be elected for three years.

The poles will be open at one o'clock P. M. and close at five o'clock P. M.

The Officers appointed to conduct the election are:

Mrs. J. H. Bachman, Inspector; Mrs. Harry James, Mrs. E. C. Young, Judges.

By order of Board of Trustees.

Mrs. Hazel Cilker,
Clerk of Cambrian School District.
